

Belt & Road Health Professionals Development Alliance

International Medical Training Program for Minimally Invasive Surgery of Sir Run Run Shaw Hospital, affiliated with Zhejiang University School of Medicine

(Laparoscopic Hepatic and Pancreatic Surgery, Stent-based Intestinal Anastomosis and Intestinal Diversion
with a Degradable Stent Surgical Technique)

Host

Beijing Medical Award Foundation

Guide

International Collaboration Office, National Health Commission of the People's Republic of China
Bureau of Medical Administration, National Health Commission of the People's Republic of China
Health Human Resources Development Center, National Health Commission of the People's Republic of China

Organizer

Sir Run Run Shaw Hospital, affiliated with Zhejiang University School of Medicine

September 2022

Content of the Program

- Through the real-time integration of live streaming surgery and immersive academic discussion seminar, present the exploration and innovative development of laparoscopic hepatic and pancreatic surgery, stent-based intestinal anastomosis and intestinal diversion with a degradable stent surgical technique in Sir Run Run Shaw Hospital.

Highlights of the Training Program

- Best opportunity to learn cutting-edge laparoscopic hepatic and pancreatic surgery, stent-based intestinal anastomosis and intestinal diversion with a degradable stent surgical technique from top hospital in China
- Best opportunity and platform to expose themselves and share experience with surgeons and other counterparts inside and outside China
- Will get the professional certificate issued by The Belt & Road Health Professionals Development Alliance after finishing the course
- All the courses are open to the registered trainees for free

Training Schedule

- November 9-10, 2022
Day 1: Live Streaming Surgery / Academic Seminar
Day 2: Live Streaming Surgery / Academic Seminar / Retrospective / Video Sharing by Trainees

Trainee Requirements for the Program

- Participation in 2021's Belt & Road training program for minimally invasive hepatic surgery is preferred
- Master Degree (or above) in Clinical Medicine with a Medical License in their own country
- Fluent English or ability to communicate in Chinese is preferred
- Rich minimally invasive surgery operation experience and aspiration to be the backbone of minimally invasive abdominal surgery surgeons

Trainees Application Process

E-mail an application form, resume and a copy of medical license before October 15th, 2022 to:

- wangmy@srrsh.com
- zhanyl@srrsh.com
